PROFESSIONAL SUMMARY

Frontend developer who builds fast, responsive web apps with React.js, JavaScript (ES6+) and Tailwind CSS. I have designed and launched full-stack e-commerce projects, including a live store that has run in production for over a year, and I use AI-assisted workflows to prototype quickly and fix bugs faster.

PROJECTS

Nishan Print: Streetwear Store
React.js · Tailwind CSS · GSAP

- Designed a modern streetwear storefront with dynamic product cards and smooth GSAP animations.
- Built mobile-first layouts with custom video hero banners and shuffle transitions.
- Optimized component structure for fast loading and an easy checkout flow.

Tourist Shoes: Live E-Commerce App
HTML5 · CSS3 · JavaScript · Node.js · MongoDB

- Built and deployed a full e-commerce site for a local footwear brand.
- Developed product navigation, filtering, sliders and cart management on both frontend and backend.
- Managed the live deployment for over a year.

RozCash: Full-Stack Rewards Platform
React.js · Node.js · Express · MongoDB

- Built user authentication, protected routes and database models.
- Connected the React frontend to a Node/Express REST API for real-time user data.

Fitness Gym Landing Page
React.js · Tailwind CSS · GSAP ScrollTrigger

- Created a responsive landing page with programs, memberships and interactive pricing tables.
- Added scroll-triggered animations with GSAP ScrollTrigger.

STRENGTHS

- **AI-assisted workflow:** Rapid prototyping, clean components and quick debugging.
- **Real-world experience:** End-to-end web apps delivered for real local businesses.
- **Modern UI/UX:** Clean layouts, cross-browser support and fast rendering.
